DETAILED ACTION

1. According to paper filed on Oct. 19, 2006, the applicants have canceled claim 18; amended claims 1-17, 19 and 20 and furthermore, have added new claims 21-29. The applicants have also submitted a new abstract.

2. Claims 1-17 and 19-29 are now pending in the application.

Specification

3. The newly submitted abstract of the disclosure is objected to because it is too long. Correction is required. See MPEP § 608.01(b).

Response to Arguments

4. Applicant's arguments, see amendment, filed on Oct. 19, 2006, with respect to the rejection(s) of claim(s) 1-20 under 35 U.S.C. 112, first paragraph, 35 U.S.C. 112, second paragraph, 35 U.S.C. 101, 35 U.S.C. 102(b) and 35 U.S.C. 102(e) have been fully considered and are persuasive. Therefore, all the rejections have been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of new matter for variable R9 as a halogen.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1, 3-11, 16, 17, 19, 20, 22, 24 and 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s)

Art Unit: 1625

contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicants have amended claims and with this amendment, added new value of variable R9 as a halogen. However, this introduces new matter since this value for variable R9 was not described in the original specification. The applicants mention in their arguments that exemplified compounds 187-189 do have support for this variable. However, these specific three examples have either bromine or iodine as a halogen and there is no other example present for other values such as fluorine and chlorine and therefore, the term –halogen--- does introduce new matter.

7. Claims 2, 12-15, 21, 23 and 26-29 are allowed.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
